# FAMILYSEARCH

- FamilySearch is a genealogy organization operated by The Church of Jesus Christ of Latter-day Saints. It is the largest genealogy organization in the world.

FamilySearch is the number 1 website for Mexican Genealogical research. They have church and civil records for all Mexican States. In my opinion, if I could only choose one website to do research this is it.

I have been doing genealogy research for well over fifteen years but in the last two years I have found more information and ancestors than on the previous ten years and it is all thanks to FamilySearch online digital images.

TIP:

Try different combinations when you search, sometime even include both last names.

**About Vallejo Families of Nuevo Leon, Mexico**

I am studying Genealogy with emphasis on the VALLEJO and LUNA families of Central Texas. My Vallejo tree dates back to 1858. I am the son of Santiago Vallejo Sr of Los Cristales, Monterrey, Nuevo Leon, Mexico and Cecilia Torres of Mendoza, Caldwell County, Texas.

I am proud to say that I have one of the biggest accumulation of Vallejo names. I try to make my results stem from factual data comes from documented articles and from books written by well known Historians.

Most of my cousins are descendants of General Antonio Fernandez Vallejo (1658-1717) who was actually born in Spain but sailed to Mexico to live out his life in Monterrey, Mexico, he is the very FIRST Vallejo in the family tree. He is the Originator of Vallejo surname for almost all families arising out of the state of Nuevo Leon, Mexico. It tickles me to hear others say that their ancestors (already in my Tree) were from Spain when in reality only the man atop the tree, General Antonio Fernandez Vallejo, came from Spain and his descendants were born in the Haciendas of Los Cristales and El Cerrito (part of Monterrey jurisdiction) and in Monterrey proper. Many were baptized and married in the Villa de Santiago which lies just 30 miles south of Monterrey. Because of the violent Mexican Revolution of 1910 many Vallejo families migrated into Texas and other states in the United States but many remain and still live the very same colonies as their ancestors.

I am a 10th generation descenant of General Antonio Fernandez Vallejo as shown here:

This is an excellent website and has a wealth of information. I personally found a great deal of information on my Marroquines whom are also ancestors of Santiago. Once you find an ancestor in this website you also have the ability to print either an ancestor report or descendant report. I did this for one of my ancestors.

TIP:

Don't forget to print a report they are easier to read and understand than the online version.

# ANCESTORS OF CRISPIN D. RENDON

The screenshot shows a website titled "Ancestors of Crispin D. RENDON". The page has a light green background with a faint tree pattern. At the top, there is a title and a paragraph of introductory text. Below that is a "Table of Contents" section with three links: "Ancestors", "Surname List", and "Name Index". A section titled "Prepared by:" lists Crispin Rendon's contact information. At the bottom, there is a footer with production details.

**Ancestors of Crispin D. RENDON**

Genealogy is a never ending exploration. The last ten years have yielded a wealth of information about my ancestors. They came from Tamaulipas, Nuevo Leon, Coahuila, Nueva Vizcaya, Nueva Galicia, Mexico City, the Caribbean, Sicily, Old Castile, Spain. Some were Native American while most were from Spain. Some had their roots as Sephardic Jews (Marranos) who became New Christians "Conversos". One fought with Cortes. Many were soldiers who fought in the Grad Chichimeca War. Some were captains and generals. One was the founder of Sabillo. One was the founder of Monterrey. Two were encomenderos. There is a lot to know about them, and much more to discover.

---

**Table of Contents**

- [Ancestors](#)
- [Surname List](#)
- [Name Index](#)

---

The ancestry report uses 'Ahnentafel' numbering. This means that the numbers for a person's parents will be twice as large as that person's number. For example, if a woman's number is 15, her father will be number 30, and her mother will be 31. Her child will be number 7.
